

**WEB BASED INTERFACE DESIGN
(CSF3133)**

Lab Report 7

Name : Muhamad Nur Iman Hafizi Bin Mohd Adib

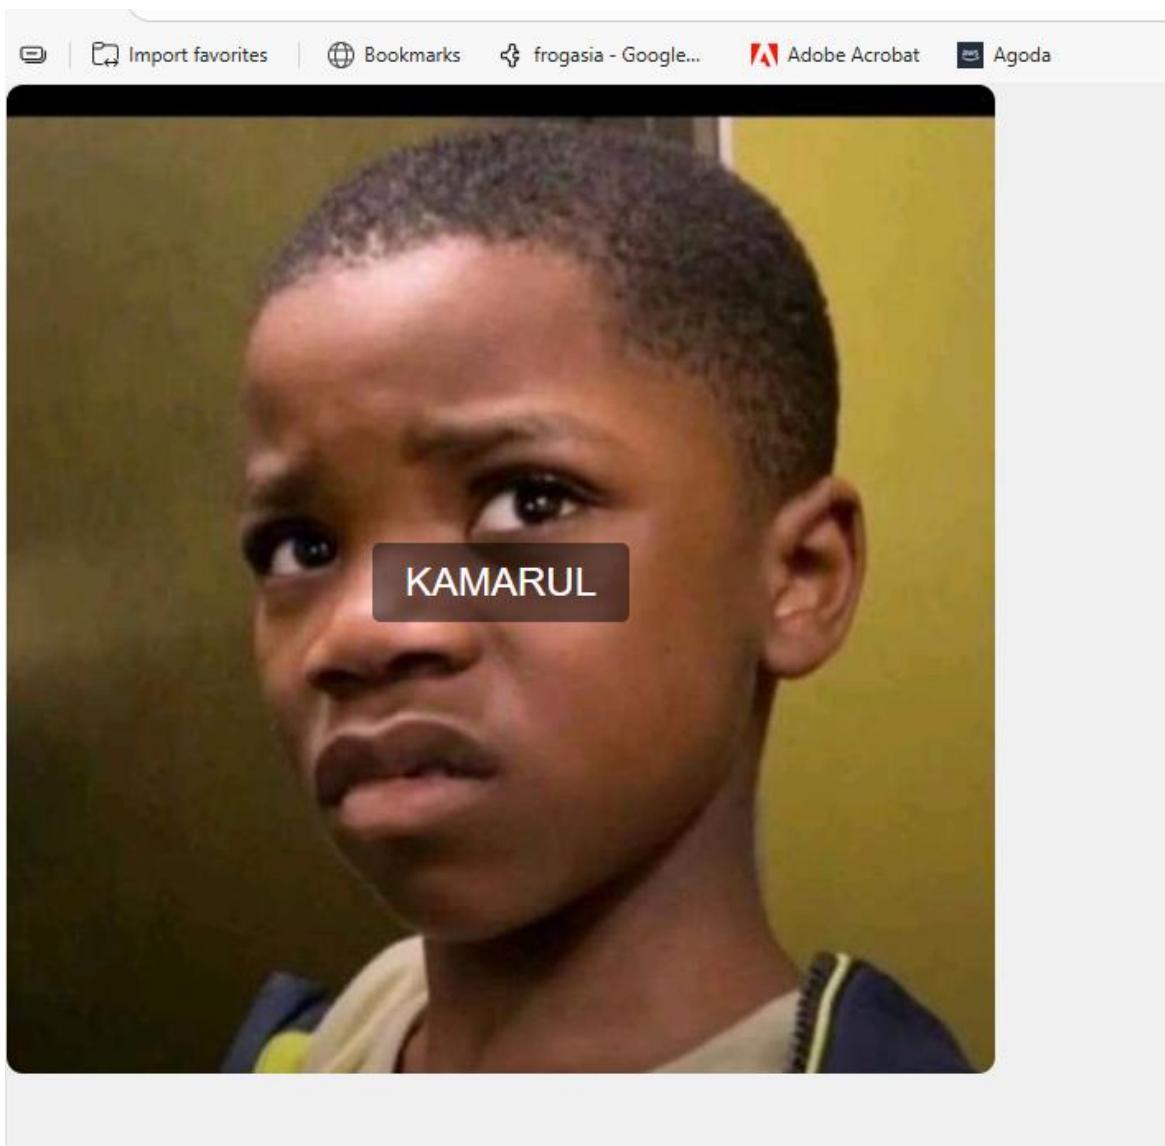

Matric : S75659

Group : K4

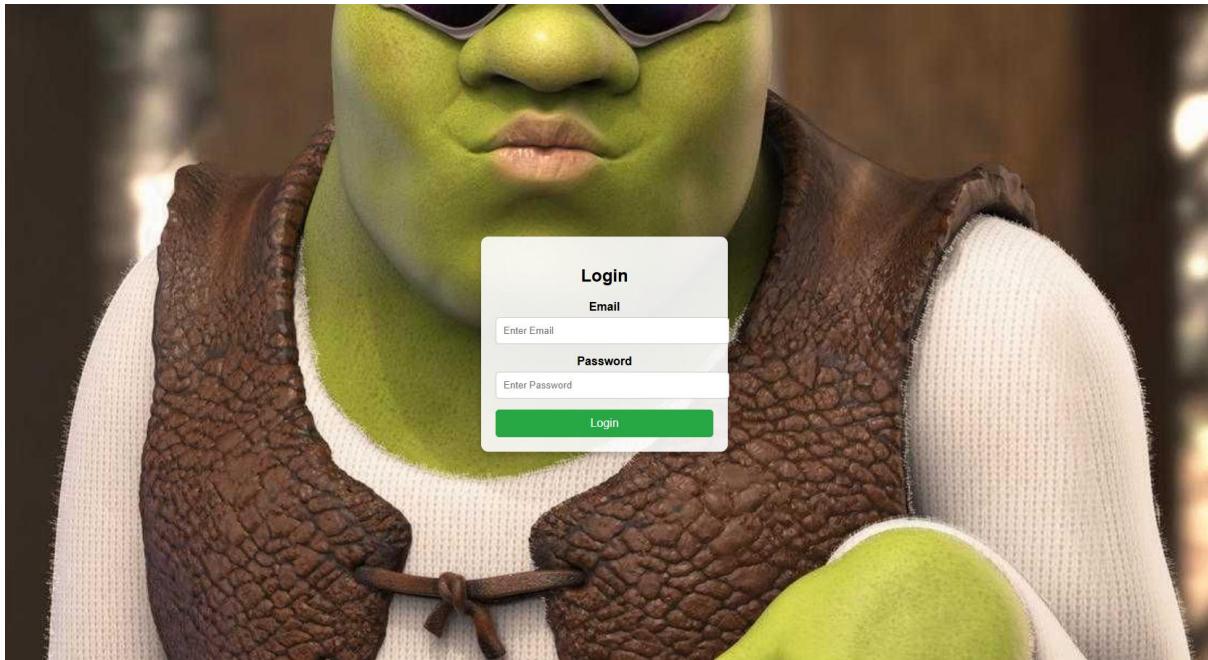

Programme : Computer Science (Software Engineering)

Demonstrator : Pn. Fatin Fatihah

1.1 Create a Transparent Image Text

1.2 Create a Form on Image

1.3 Create a Side Navigation Buttons

A wireframe diagram of a user interface. On the left side, there is a vertical sidebar containing four dark grey rectangular buttons labeled "Section 1", "Section 2", "Section 3", and "Section 4" from top to bottom. To the right of the sidebar are four light grey rectangular content boxes, each with a title and a brief description. The first box is titled "Section 1" and contains the text "This is the content for Section 1.". The second box is titled "Section 2" and contains the text "This is the content for Section 2.". The third box is titled "Section 3" and contains the text "This is the content for Section 3.". The fourth box is titled "Section 4" and contains the text "This is the content for Section 4.". The entire interface is enclosed in a thin black border.

1.4 Create Automatic Slideshow

Slide 1

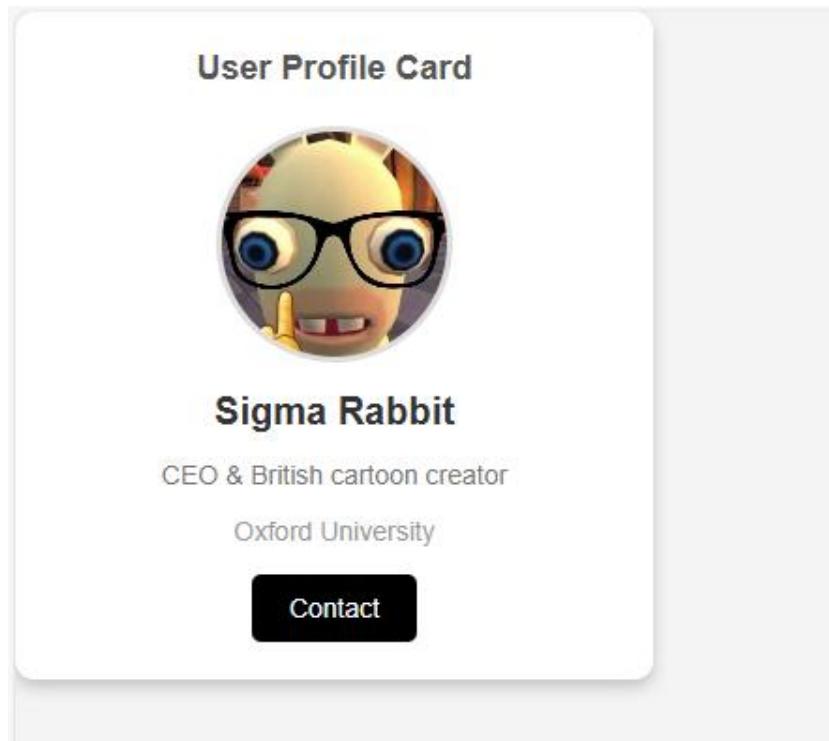

Slide 2

Slide 3

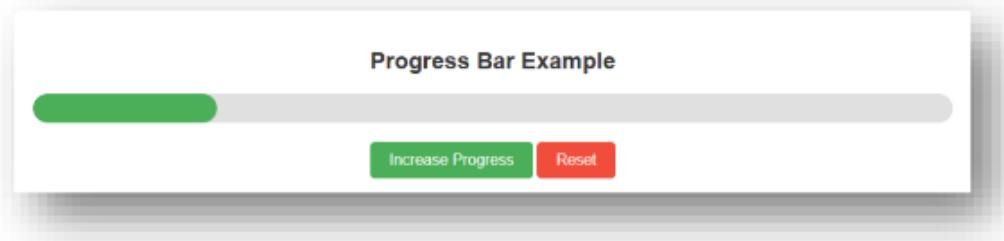

1.5 Create Profile Card

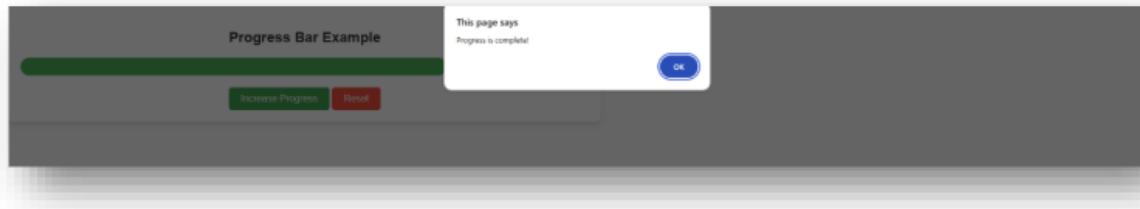

1.6 Create Progress Bar

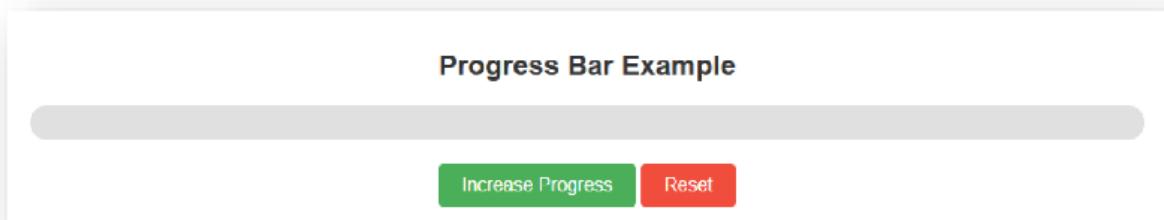

When I press the “Increase Progress” button:

When the progress bar is full:

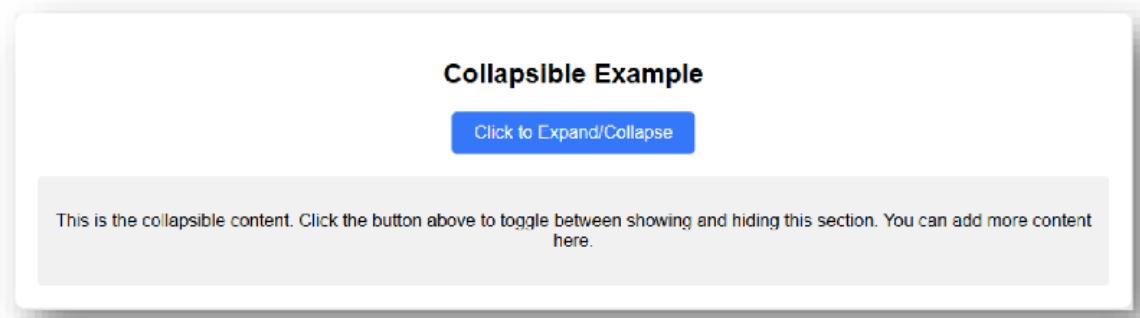

When I press the “reset” button:

1.7 Create A Collapsible

When I press the “Click to Expand/Collapse” button:

Lab Exercise

A screenshot of a website showing a "User Login" form and a large image of a bald eagle. The left sidebar contains the same navigation links as the previous screenshot. The main content area features the "User Login" heading, two input fields ("Enter username" and "Enter password"), and a "Login" button. Below the login form is a large, detailed image of a bald eagle's head and shoulders, looking directly forward against a black background.
